

Create Your DVD Instantly with ImageMixer 3!

Follow the steps below to create a DVD-Video with a nice-looking menu using videos from your camcorder!

1 Connect your camcorder and the computer.

2 Double-click the icon.

 You can also start up ImageMixer 3 by clicking...

[Start] menu > [All Programs] > [PIXELA] > [ImageMixer3] > [ImageMixer3]

ImageMixer3

3 Click the [Author DVD-Video] button.

 **What's Authoring?**

Authoring is to combine multiple materials, such as text, images, audio or videos, and edit and put them together as one content. "DVD-Video Authoring" means putting the source materials together and creating a DVD-Video.

4 Click the [Create New DVD] button.

5 Set up your project.

1 Click the [Browse] button and select the destination.

2 Select the [Video Format].

3 Select [High quality] or [Standard quality].

4 Click the [OK] button.
The [Importing Device] dialog appears.

What's Project?

A project is the editing content and you can save the editing condition in mid-flow as a project file.

6 Import videos from your camcorder.

- 1 Select the camcorder in the dialog.
* The drive name shown in the figure is different from the actual drive name of your camcorder.
- 2 Click the [Import] button.

- 3 Select the file you wish to add to the DVD-Video and drag & drop to the list.

Adding to the list

You can also select the file you wish to store in the DVD-Video and click the [Import] button to add the file to the list.

Now you have imported the videos as the source material for the DVD-Video you are about to create.

7 Create a menu screen for the DVD.

- 1 Click the [Authoring] button.

- 2** Click the [Theme] button.
ImageMixer 3 offers various types of menus for you to choose from. Just drag & drop the videos you have imported to the menu to create a nice-looking DVD.

- 3** Click a theme you like.

- 4** Click the [Source] button.

- 5** Drag & drop the videos to the theme.
* Click the text/buttons to edit them.

Now you have created the menu screen for your DVD.

8 Preview the result.

1 Click the [Write] button.

2 Click the [Preview] button.

3 Click the [Enter] button.
Playback starts.

4 Click the [] button after you check
the contents.

Are you ready to actually write the content to a disc?

9 Set a blank DVD in the drive.

10 Write to a blank DVD.

1 Click the [Write Settings] button.

2 Check [Create disc].

3 Select the writing drive in [Select Drive], and enter a name for the DVD you are creating in [Disc Name].
* The drive name shown in the figure is different from the actual drive name of your camcorder.

4 Click the [Write] button.

- 5 Check the writing settings and click the [OK] button.

When writing is finished, the DVD will be ejected from the drive.

Done! Playback the disc you've just created on your DVD player or DVD recorder.
